A bit about this session

It's an audience interactive session, where you will be asked to provide a choice in certain situations.

It's based on a roleplay scenario, where you're a new employee for a large German corporation.

Various topics will potentially be covered depending on what is chosen by yourselves.

Your review

Your boss catches up with you for a quick review.

He's really pleased with how you handled the SQL Server 2012 and 2016 issues, as well as all your other efforts relating to the ever changing Data Platform.

He's impressed by how keen you are to keep up with new technologies and your level of expertise; and he sees a bright future for you.
